

**We introduce you to
Click ON xComfort from Eaton:
The new way to control
THE SMART HOME**

Searching for light switches on the walls and forgetting to turn the lights off when leaving a room is something we all experience on a daily basis. Thanks to Click ON, you will not have to worry about this anymore.

Click ON is a unique and tailor made wireless light switch built right into the door handle.

You don't need to install any light switches on the wall.

You don't have search for a switch on the wall or look in vain for a remote control.

Click ON replaces your standard light switch.

With one ergonomic flick of your finger you can turn the light on in one room while opening the door.

You can turn the light on comfortably and safely in the room you are entering or turn it off in the room you are leaving.

You control the lights in two rooms from one place.

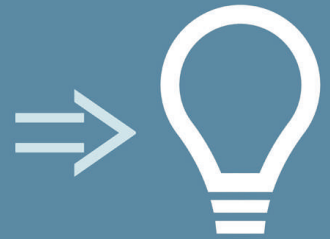

You can fully rely on Click ON: you always know where the light switch is.

Fit your home with SMART HOME technology and use your smartphone to gain the freedom of control.

Click ON & Eaton
www.clickon.cz

- No more searching for a light switch
- Easy touch
- Intelligent & High-Tech
- Elegant design
- Simple installation

One click. No switch.

Click ON can be installed in 3 versions: on doors, in a semi-recessed or fully recessed design.
You can choose depending on what you prefer or like the most.

Its elegant and sleek design blends beautifully with the design of the door
and thus Click ON becomes a natural part of it.

The Click ON device uses the same wireless technology
as the other parts of the xComfort SMART HOME from Eaton.

Thanks to that you can also control the lights using your
smartphone, personal computer or tablet.

Installing Click ON is very simple.

You can easily install it yourself with a screwdriver and
built-in magnets or we can install it for you.

For greater ease and comfort, install Click ON in your home.
